© 1995-2020, Dassault Systemes SolidWorks Corporation, a Dassault Systèmes SE company, 175 Wyman Street, Waltham, Mass. 02451 USA. All Rights Reserved.

The information and the software discussed in this document are subject to change without notice and are not commitments by Dassault Systemes SolidWorks Corporation (DS SolidWorks).

No material may be reproduced or transmitted in any form or by any means, electronically or manually, for any purpose without the express written permission of DS SolidWorks.

The software discussed in this document is furnished under a license and may be used or copied only in accordance with the terms of the license. All warranties given by DS SolidWorks as to the software and documentation are set forth in the license agreement, and nothing stated in, or implied by, this document or its contents shall be considered or deemed a modification or amendment of any terms, including warranties, in the license agreement.

For a full list of the patents, trademarks, and third-party software contained in this release, please go to the Legal Notices in the SOLIDWORKS documentation.

Restricted Rights

This clause applies to all acquisitions of Dassault Systèmes Offerings by or for the United States federal government, or by any prime contractor or subcontractor (at any tier) under any contract, grant, cooperative agreement or other activity with the federal government. The software, documentation and any other technical data provided hereunder is commercial in nature and developed solely at private expense. The Software is delivered as "Commercial Computer Software" as defined in DFARS 252.227-7014 (June 1995) or as a "Commercial Item" as defined in FAR 2.101(a) and as such is provided with only such rights as are provided in Dassault Systèmes standard commercial end user license agreement. Technical data is provided with limited rights only as provided in DFAR 252.227-7015 (Nov. 1995) or FAR 52.227-14 (June 1987), whichever is applicable. The terms and conditions of the Dassault Systèmes standard commercial end user license agreement shall pertain to the United States government's use and disclosure of this software, and shall supersede any conflicting contractual terms and conditions. If the DS standard commercial license fails to meet the United States government's needs or is inconsistent in any respect with United States Federal law, the United States government agrees to return this software, unused, to DS. The following additional statement applies only to acquisitions governed by DFARS Subpart 227.4 (October 1988): "Restricted Rights - use, duplication and disclosure by the Government is subject to restrictions as set forth in subparagraph (c)(1)(ii) of the Rights in Technical Data and Computer Software clause at DFARS 252-227-7013 (Oct. 1988)."

In the event that you receive a request from any agency of the U.S. Government to provide Software with rights beyond those set forth above, you will notify DS SolidWorks of the scope of the request and DS SolidWorks will have five (5) business days to, in its sole discretion, accept or reject such request. Contractor/ Manufacturer: Dassault Systemes SolidWorks Corporation, 175 Wyman Street, Waltham, Massachusetts 02451 USA.

Introduction

About This Course	2
Prerequisites	2
Using this Book	2
A Note About Dimensions	3
About the Training Files.....	3
Training Templates.....	3
Accessing Training Templates in SOLIDWORKS	4
Conventions Used in this Book	5
Windows OS.....	5
Use of Color	5
Accessing Commands.....	6
More SOLIDWORKS Training Resources.....	6
Local User Groups	6

Lesson 1

Understanding Surfaces

Solids and Surfaces	8
Geometry vs. Topology	8
What is a Solid?	10
Euler's Formula	10
Behind the Scenes	10
Adjusting FeatureManager Settings	10
Introducing: Extruded Surface	11
Introducing: Planar Surface	13
Introducing: Trim Surface	14
Introducing: Untrim Surface	15
Face Curves and Mesh Preview	16
Introducing: Face Curves	16
Surface Types	16
Four-Sided Surfaces	18
Introducing: Knit Surface	19
Creating Solids from Surfaces	20
Introducing: Create Solid	20
Introducing: Thicken	20
Summary	21
Decomposing a Solid into Surfaces	21
Introducing: Delete Face	21
Additional Surface Concepts	23
Boolean Operations	23
Edges vs. Holes	23
Take Aways	24
Why Use Surfaces?	24
When Not to Use Surfaces	25
Hybrid Modeling	25
Continuity Explained	26
Workflow with Surfaces	27
Working with Images	27
Layout Sketch	28
Identify Symmetry and Edges	29
Identify Functional Faces	30
Check your Models Frequently	30
Check Entity	31
Understanding Rebuild Options	31
Introducing: Verification on Rebuild	31
Folders in the FeatureManager Design Tree	32
Clean-up	32
Exercise 1: Trimming Surfaces	33
Exercise 2: Trimming and Knitting	36
Introducing: Curve Through Reference Points	37

Lesson 2**Introduction to Surfacing**

Similarities Between Solid and Surface Modeling	40
Basic Surfacing	40
Introducing: Revolved Surface	42
Introducing: Swept Surface	42
Filleting Surfaces	45
Cutting the Bottom	46
Introducing: Radiate Surface	47
Introducing: Cut with Surface	47
Alternative to Trim	49
Introducing: Intersect	49
Solid from Imported Surfaces	49
Changing a Solid With a Surface	51
Recreating a Molded Part	52
Exercise 3: Basic Surface Modeling	54
Introducing: Extend Surface	55
Exercise 4: Halyard Guide	59
Exercise 5: Finial Scroll	64
Ruled Surface	66
Exercise 6: Using Intersect	71
Exercise 7: Camera Body	73

Lesson 3**Solid-Surface Hybrid Modeling**

Hybrid Modeling	76
Using Surfaces to Modify Solids	77
Display	78
Introducing: Replace Face	80
Interchanging Between Solids and Surfaces	82
Performance Implications	83
What Contributes to Rebuild Time?	85
Surfaces as Construction Geometry	86
Stages in the Process	86
Making Copies of Faces	92
Introducing: Offset Surface	92
Repairing Countersunk Hole Problem	92
Flattening Surfaces	95
Introducing: Surface Flatten	95
Exercise 8: Lofting Between Surfaces	97
Exercise 9: Finial Wrap	99
Exercise 10: Flatten Surface	104

Lesson 4**Repairing and Editing Imported Geometry**

Importing Data	108
Modeling Kernels	108
Contents of a CAD File	108
File Formats	109
Format Recommendations	110
File Translation	110
Why Do Imports Fail?	111
SOLIDWORKS Import Options.	111
3D Interconnect for Native File Formats	111
3D Interconnect for Neutral File Formats.	112
Importing a STEP File	113
Introducing: Import Diagnostics.	114
Addressing Errors in 3D Interconnect Imports.	115
Another Option	117
Comparing Geometry	118
Which is Correct?	120
Addressing Translation Errors	121
Repairing and Editing Imported Geometry	121
Introducing: Check Entity.	122
Introducing: Display Curvature	123
Patching Strategies	125
Introducing: Filled Surface	125
Another Strategy	127
Procedure for Rebuilding Fillets.	129
Extend Surface	130
Editing Imported Parts	132
Delete Hole	134
Exercise 11: Import Diagnosis	136
Exercise 12: Using Import Surface and Replace Face	139
Exercise 13: Repairing Imported Geometry	142

Lesson 5**Blends and Patches**

Smoothing Patches	148
Three Alternative Approaches	148
Boundary Surface	151
Introducing: Boundary Surface.	151
Corner Blends	155
Stages in the Process.	155
Alternative Approach	158
Spline on Surface	160
Introducing: Spline on Surface	160
Exercise 14: Bathtub Fillet	164
Exercise 15: Corner Blend	167

Lesson 6

Complex Blends

Complex Blends	172
Stages in the Process.	173
Splitting Trim Boundaries	176
The Cumulative Effect of Tolerances.	180
Hide/Show Bodies	180
Introducing: Hide/Show Bodies	180
Using the Tab Key	180
Trimming the Bottom Bracket	182
Freeform Feature.	184
Introducing: Freeform.	184
Mesh Orientation	186
Using the Triad	189
Moving Control Points	190
Undoing Changes	191
Boundary Conditions	191
Exercise 16: Bicycle Frame	195
Exercise 17: Patches	202

Lesson 7

Advanced Surface Modeling

Stages in the Process.	210
Using Sketch Pictures	211
Creating the Parting Surface.	214
Construction Surfaces.	217
Lofted Surface.	218
Adding a Loft Section.	222
An Alternative Approach	224
Modeling the Lower Half	227
Introducing: Partial Ellipse	229
Preparation for Using Filled Surface	231
Completing the Solid Model.	233
Design Changes	235
Dynamic Feature Editing	235
Introducing: Instant3D	236
Replacing the Planar Face.	237
Creating a Flat Surface	239
Exercise 18: Mouse Model	241
Exercise 19: Bar of Soap	251
Exercise 20: Handle	259

Lesson 8**Master Model Techniques**

Introduction to Master Models	268
Transmitting Curve Data	269
Push and Pull type Operations	269
Naming Bodies	270
Specifying the Configuration of the Parent	271
Split Feature	271
Summary of Recommendations	271
Surface Master Model Technique	272
Propagating Changes	273
Working with a Solid Master Model	279
Splitting the Part	279
Modeling the Keypad	281
Specialized Features for Plastic Parts	286
Introducing: Fastening Features	286
Mounting Boss	287
Reveal	293
Introducing: Draft Analysis	297
Snap Hook and Groove	299
Favorites	300
Saving the Bodies and Creating an Assembly	303
Exercise 21: Solid Master Model	304
